World–Action Model | Features and Readout

One member · one step

Feature encoders

Node · 45-D

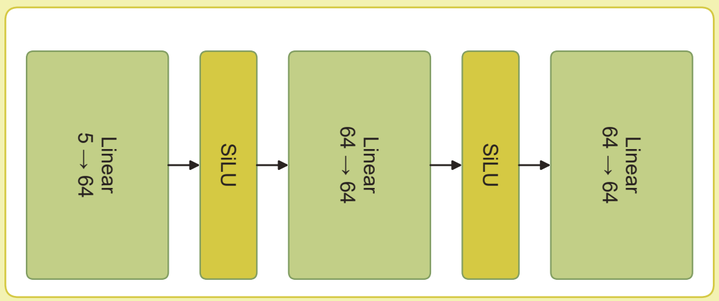

Position 2 | Fourier 24 | History 9
Shape 6 | Wall 3 | Image edge 1

64-D encoding

Edge · 5-D

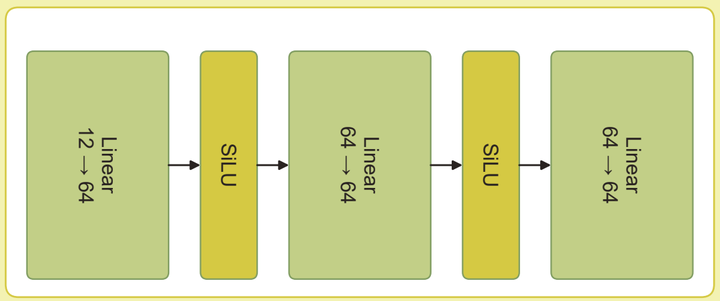

Relative position 2 | Distance 1
Surface gap 1 | Log-area difference 1

64-D encoding

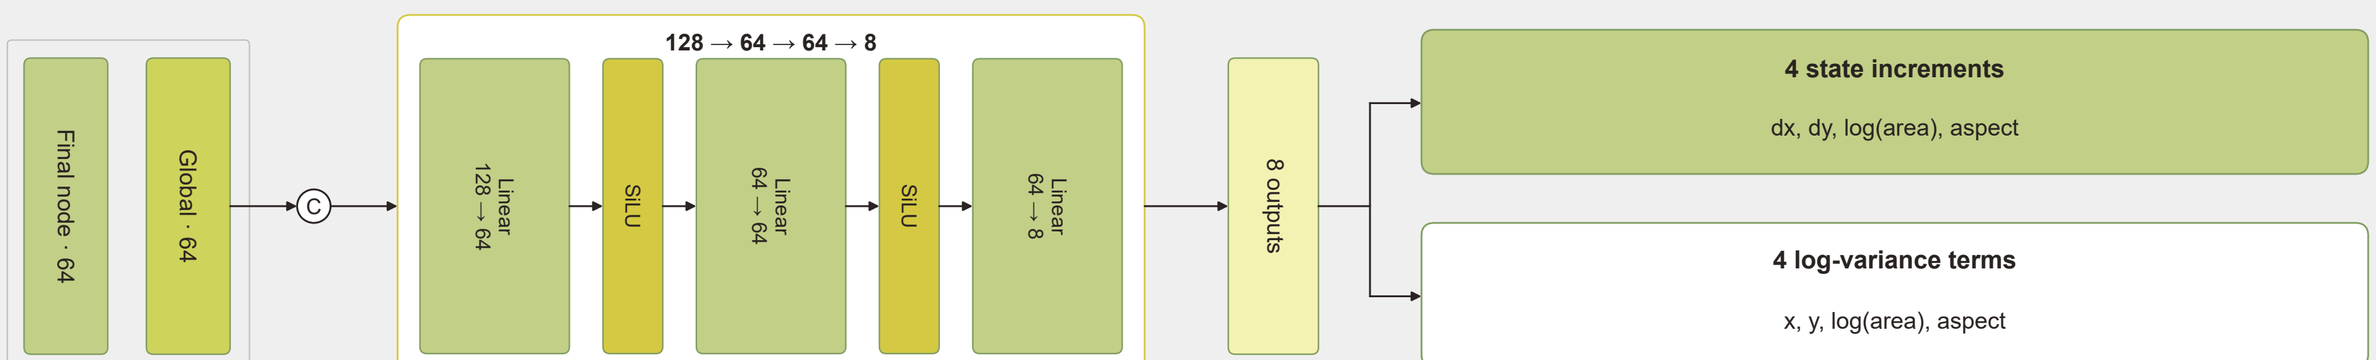

Global · 12-D

Current + previous PZT 8
Time since switch 1 | Field motion 3

64-D encoding

Node decoder

Position increment × 5 px; log-area and aspect increments × 0.1
